

DD/S 71-3682

31 SEP 1971

MEMORANDUM FOR: Director of Security

SUBJECT : Removal of Barriers

DD/S REGISTRY  
FILE *Security* 1

Oz:

1. Colonel White, in response to my memorandum of 13 September 1971 (DD/S 71-3560), has instructed us to continue our efforts to solve the gray line telephone problem and remove the barriers. He has also requested a monthly progress report on our coordinated efforts to achieve these goals.

2. Therefore, I suggest you redraft your comprehensive 15 June 1971 paper to reflect the current situation, especially with NSA, and pertinent background information. I believe Colonel White would find such a report informative and useful. Also, it will provide a reference paper for future monthly progress reports, thus making them reasonably simple to compile.

3. This initial report should be coordinated with OL and OC and should touch all aspects, including the securing of the floor cells and related matters. I would appreciate receiving it by 30 September. Future coordinated progress reports from your Office should reach me by the 25th of each month until we get this problem solved.

*15/10/71*  
Robert S. Wattles  
Assistant Deputy Director  
for Support

Att: Memo dtd 15 June 71 to DD/S fm  
D/Sec, subj: Removal of Turnstiles  
from Restricted Areas in the Head-  
quarters Building [redacted]

15 JUN 1971

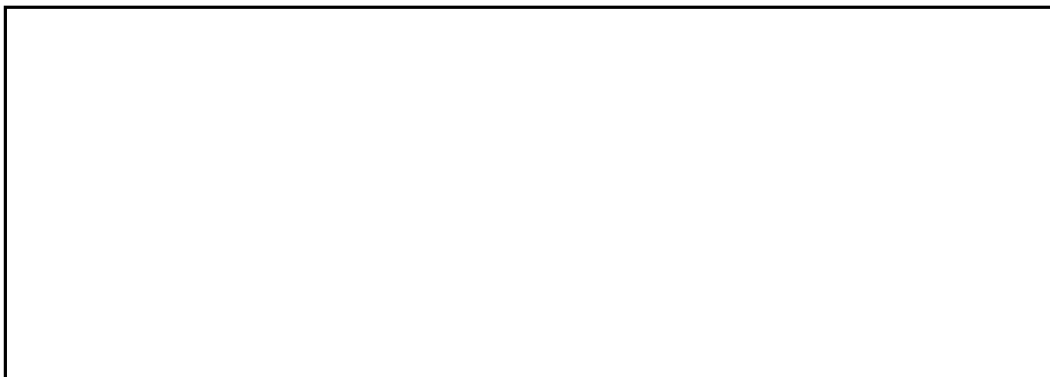

**MEMORANDUM FOR: Deputy Director for Support**

**SUBJECT : Removal of Turnstiles from Restricted Areas in the Headquarters Building**

1. This memorandum contains three recommendations for your approval; such recommendations are contained in paragraph 5.

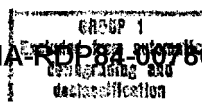

2. As the result of a series of studies aimed at reducing costs and alleviating the chronic shortage of GSA guards in the Headquarters Building Company, certain conclusions have been reached. We believe that all fixed guard posts, receptionist posts, and all corridor control points in the two CODEWORD Restricted Areas in the Headquarters Building can be eliminated with a great savings of manpower and money while still maintaining satisfactory security.

3. In order to judge the potential effectiveness of a proposed change to our present system, it is necessary to compare the security practices in the existing Restricted Areas and Compartmented Areas within the Headquarters Building. The procedures are as follows:
